PROJECTS

Kobayashi Bites – Kobayashi Bites is a comprehensive restaurant management e-commerce platform built with React.js and JavaScript. It offers distinct customer, vendor, and customer experiences and integrates modern technologies like Framer Motion, JWT, Firebase, MongoDB.
Code(Client) || Code(Server) || Live Site

Features:

- **Multi-Role Auth:** JWT-based system with role access (Customer/Vendor/Admin), secure tokens & refresh.
- **Smart Cart:** Single-vendor restriction, auto cart clear, and seamless UX with custom modal confirmations.
- **Intelligent Payment:** Automated status checks, cart clearing, error handling, and reliable transactions.

Plant Care – Plant Care is an online business platform enabling users to share and discover technical content with premium subscription features. Built using React.js 14, JavaScript, Tailwind CSS, Node.js, Express, and MongoDB with Stripe.
Code(Client) || Code(Server) || Live Site

Features:

- **Advanced Content Management:** A rich text editor with multimedia support and PDF export functionality.
- **Premium Content Monetization:** Subscription-based access system with Stripe payment integration.
- **Interactive Analytics Dashboard:** Real-time data visualisation for user engagement and revenue metrics

English Janala – English Janala is a modern web application for learning English vocabulary through word meanings, pronunciation with voice effects, blogs, and FAQs. It includes user authentication for login and logout, and uses JavaScript (ES6) and Tailwind CSS for a responsive and clean user experience..
Code(Client) || Live Site

Features:

- The front end was developed using JavaScript, tailwind CSS.
- Users can learn new languages and from the community page ask for help from other members.
